

Q. Identify the list of variables and their datatype for the following

(i) bill of an amazon order

(ii) A train/plane/bus ticket

(iii) Current bill

(iv) Gas bill

i) Bill of an Amazon Order

Order ID → String
Order date → String
Item names → Array of Strings
Item prices → Array of Doubles
Quantity → Int
Discount → Double
Shipping charge → Double
Total amount → Double
Payment mode → String

(ii) A train/plane/bus ticket

Ticket number (PNR) → String/Long
Passenger name → String
Source station/airport → String
Destination station → String
Date of journey → String
Time → String
(Departure & Arrival)
Seat number → String
Coach class → Char
Age → Int
Gender → Char

(iii) Current bill

Consumer Number — long
units Consumed — int
rate per unit — float
total Amount — double
is paid — boolean
meter type — char
due date — string
Meter reading — int
complaints calls — int
website name — string

(iv) Gas bill

Consumer number → string
Billing period → string
Cylinder / units used → int or Double
Rate → double
Total amount → double
Due date → string
Delivery date → string
Payment status → Boolean
Connection type → char
cylinder weight → float.
